Continuing Education Courses

ILLINOIS CONSTITUENT PRESIDENT'S REPORT

ILLINOIS CONSTITUENT

Welcome to the second edition of the IL AGD CE Advisory. The volunteer officers and leaders of the Illinois AGD have been working very hard to provide current, quality and value priced continuing education for our members. The mission of the AGD is "to serve the needs and represent the interests of general dentists, to promote the oral health of the public and to foster continued proficiency of general dentists through quality continuing education in order to better serve the public." Illinois AGD provides you with the opportunity for personal and professional development that will help you distinguish yourself among your peers and demonstrate your commitment to your patients. You will learn from leading clinicians in a multitude of disciplines in our CE courses. You will learn advanced techniques and treatments and be able to use the latest innovations in dental equipment, materials and products. If you are an Illinois AGD member, we thank you for your membership! Please talk to your non-member colleagues about all the benefits of being an AGD member. In fact, win a trip to next year's Annual Session in San Francisco for recruiting new members. Join our "Refer a Colleague" program and refer at least one new member between now and December 31, 2014 and be entered into a drawing for a chance to win a trip for you and your new member "guest" to attend the 2015 AGD meeting in San Francisco!

AGD offers many other member benefits including our Mastership and Fellowship Awards, online CE opportunities, Member Savings & Offers, and complimentary subscriptions and online access to our award winning publications--AGD Impact and General Dentistry. AGD is here to educate and protect the general dentist on advocacy issues affecting our profession. AGD is dedicated to helping general dentists like you succeed. Continue furthering your career and profession by getting involved with ILAGD and if you aren't a member now--Please Join Today!

Healthy Smiles Begin Before Birth: Updates on Providing Oral Health Care to Pregnant Women and their Babies

Wednesday, September 17, 2014
Renaissance Schaumburg Convention Center
1551 North Thoreau Drive
Schaumburg, IL 60173

A Symposium with *Cathryn E. Albrecht, Esq., John Crawford, BDS, PhD; Gloria Elam, MD, MPH; Jason Grinter, DDS; Fred Margolis, DDS Zak Messieha, DDS; Brenden Moon, DMD; Indru Punwani DDS, MSD; Herve Sroussi, DMD, PhD; and Gina Swehla*

Credit Hours: 7 hours of Special Patient Care Lecture towards AGD Fellowship or Mastership

Presented by: Illinois Society of Pediatric Dentists Illinois Academy of General Dentistry, Illinois State Dental Society, Illinois Chapter, American Academy of Pediatrics with funding from the DentaQuest Foundation A member benefit for IL AGD, ISDS or ISPS members before the ISDS Annual Session

This symposium provides an opportunity to discuss the effect of maternal oral health on birth outcomes. It will explore safe, effective protocols in preventative and treatment care, guidance for pregnant women and the importance of the year one exam. A discussion will address the timely topics of legal considerations, reimbursement issues and treatment of pregnant women in private and public health settings to improve the health of women and children.

7:30-8am - Registration, Continental Breakfast

8:00 am - Everything You Need to Know About Pregnancy

Gloria Elam, MD, MPH

Topics to be covered: Pregnancy period, risk levels, guidelines for health care, high risk pregnancies/IVF protocols/drugs

9:00 am - The Relationship Between Pregnancy Outcomes and Periodontal Disease

John Crawford, BDS, PhD

Topics to be covered: effects of pregnancy on periodontal tissues, evidence of association between periodontal diseases and pregnancy outcomes, evidence that periodontal therapy affects pregnancy outcomes, the mechanisms that have been proposed for a potential causal relationship between periodontal diseases and pregnancy outcomes.

10:00 am - Considerations in Caring for Pregnant Women: Overview of the Professional Guidelines, Radiographs and Assessment of Risk Level

Herve Sroussi, DMD, PhD

Topics to be covered: Discuss and apply in oral health care in a dental office-preventive care, routine care, complex care-related to risk levels, exposure to radiographs and risk benefits.

11:00 am - Management of Pain and Anxiety for Oral Health Care for Pregnant Women

Zak Messieha, DDS

Topics to be covered: Nitrous oxide/minimum/moderate sedations/anesthesia/drug interactions

Noon Lunch – There will be an IL AGD Business Meeting and Installation of Officers over the lunch hour.

1:00 pm Panel Discussion: The Nuts and Bolts of Providing Care in Your Practice

Moderator: *Jason Grinter, DDS*

Topics to be covered:

Legal Considerations for Oral Health Care of Pregnant Women and Adolescents

Cathryn E. Albrecht

Reimbursement Strategies for Medicaid Patients – Updates on Care Coordination

Gina Swehla

Making it Work: Caring for Pregnant Women and their Infants

Moderator: *Jason Grinter, DDS*

2:30 pm Setting the Stage for a Lifetime of Healthy Smiles – The Age One Visit

Fred Margolis, DDS

Topics to be covered: the AAPD guidelines for age if first dental visit, the goals of the first dental visit, methods for engagement of Pediatric Primary Care providers to increase referrals

3:30 pm - Putting It All together – Ready Your Office to Treat a Family: Pregnancy, infancy and Beyond

Brenden Moon, DMD

Emcee: *Indru Punwani DDS, MSD*

**The Illinois Academy of
General Dentistry presents**

The 22nd Annual Ted Weclaw Memorial Lecture

**Success=
Where Preparation Meets Opportunity...
The Highly Efficient Practice (While Having Fun Doing It)**

An IL AGD Member Benefit CE Course

Success is where preparation meets opportunity. Practice enjoyment comes from being efficient at whatever level of dentistry you do. Efficiency is defined as competency in performance while accomplishing a job with minimum expenditure of time and effort. It would be nice if efficiency was just about hiring another staff member, receiving free supplies or buying that magic piece of equipment. Not so easy. It's more about developing a vision of what you want your practice to be, having a well-designed office with great equipment, having a terrific support team, and doing profitable procedures as fast and well as possible. Those will make you a happy practitioner. Those are what we are going to focus on.

This course deals with the basics of making the office highly efficient while focusing on 4 critical areas: the office, the staff, the schedule and the skill level of the doctor and staff. All are critical for practicing with little stress, higher enjoyment, and more profitability. The best way to flourish in any economy is to offer a variety of efficient procedures that patients almost always need and want. Starting with an office that shows the quality of work you do and a staff that truly believes "it's not about me."

It then makes sense that we have a plan in place to keep the schedule full of people who desire our work. This course takes a look at many aspects of everyday practice to promote profitable busyness while offering procedures that are highly profitable.

Date: **Wednesday, February 25, 2015;**
the day before the Chicago Midwinter Meeting

Location: **American Dental Association Auditorium**
211 E. Chicago Ave., Chicago, IL 60611

Time: **8:00 am - 4:00 pm; Registration at 7:30 am**
Continental breakfast and lunch will be served.

Registration will be online at ILAGD.org starting 11/1/14
Brochures will be mailed in December.

AGD Dues Paid Dentist	\$95
Non-AGD Dentist	\$345
Hygienist	\$75
Dental Staff	\$75
Dental Students & Residents	FREE (Preregistration required)

Dr. Griffin runs a busy practice in St. Louis County where he and his staff maintain a 50-55% overhead since 1988. His Eureka Smile Center emphasizes cosmetics while doing all phases of general dentistry. Dr. Griffin is one of a handful of dentists awarded by his peers Diplomate status with the American Board of Aesthetic Dentistry (ABAD), accreditation with the American Academy of Cosmetic Dentistry (AACD), and Mastership in the Academy of General Dentistry (AGD). Dr. Griffin's unique philosophy focuses on improving clinical and financial outcomes while making practice more fun and rewarding. Dr. Griffin has been the MasterTrack/CE chair for the Missouri AGD, a member and clinical evaluator for Catapult Elite, the dental industry's premier speakers bureau, and is a clinical director for the Pacific Esthetic Continuum (PAC). He has also been a clinical evaluator for Reality Esthetics and served on the Council for Scientific Affairs for the Greater St. Louis Dental Society.

CE Credits: 7 Hours lecture will be awarded for this program.

*AGD dues paid status will be checked as of February 18, 2015. Any Non-AGD Dentist may choose to apply his /her entire registration fee to his/her first year of AGD dues by submitting a completed AGD Application onsite. Ask for Dr. Cheryl Mora or Deb Noordhoff for help in completing this process.

Save the Date: February 24, 2016
Pareesh Shah, DMD, FAGD, M.Sc., B.Sc.,
Predictable Implant Esthetics

We have been the dental lab behind Chicagoland's best doctors for over 30 years.

We give them more to smile about.

HIGH TECH

Our lab is a state of the art facility featuring the best in current technologies. We are outfitted with laser, CAD/CAM technology, milling machines and scanners. We have a custom shade room where your patients get personalized attention and the perfect shade match for each individual.

HIGH EXPERIENCE

All of our technicians at HI-Point are experienced professionals with at least ten years of work in the field. Our staff continues education through seminars, webinars, hands-on workshops, and working with industry professionals to stay current on the latest innovations and techniques.

HIGH QUALITY

All-on-4, crowns, bridges, implants, removables—our lab provides it all. Each case, no matter how large or small, goes through a rigorous quality control check. We receive jobs from local labs that have come to trust our work on even the most difficult cases.

Please ask us how Hi-Point can help you today!

AGD Fellowship, Mastership, & LLSR Awards

Presented at the 2014 AGD Annual
Session in Detroit

A Convocation ceremony to honor the new AGD Fellows and Masters recipients took place on Saturday, June 28, 2014 in Detroit, Michigan. Fellowship and Mastership in the Academy of General Dentistry are prestigious symbols of dentistry's continual journey toward improvement and progress. Masters and Fellows of the Academy embody the Academy's principles and ideals accept an obligation to continually prove themselves worthy of the designation throughout their professional life.

To earn Fellowship, dentists must be Academy members for three consecutive years, earn a minimum of 500 approved continuing education credits, pass a comprehensive 250-question examination, apply for the award, and attend an AGD Convocation Ceremony.

To attain Mastership, members must be Fellows in the AGD who have earned an additional 600 approved continuing education credits, meeting the minimum requirements in each of the dental disciplines. In addition, 400 of the required credits must be in participation courses, where skills are learned through manipulation of dental materials. The final requirement of Mastership is to attend an AGD Convocation Ceremony.

Lifelong Learning & Service Recognition (LLSR) is a formal recognition for AGD Masters in the area of continuing education, dental related community service, and service to organized dentistry. The prestigious LLSR symbolizes a member's dedication to remain current in dentistry and give back to his or her community. By embracing the core beliefs of the AGD throughout their careers, LLSR recipients have set a higher standard that all general dentists are encouraged to emulate.

This annual ceremony is the profession's most prestigious event. It continues an annual tradition set in 1962, when the first 20 Fellows of the Academy of General Dentistry received their awards at a small dinner ceremony following a course presentation and business meeting.

The Fellows, Masters and LLSRs honored this year represent a commitment to lifelong learning and support for the AGD's mission, "to serve the needs and to represent the interests of general dentists and to foster their continued proficiency through quality continuing dental education in order to better serve the public."

The following is a list of the newly honored Illinois Fellows and Masters recipients that participated in the convocation ceremony last month in Detroit, Michigan:

Illinois (Fellows)

Brenden Moon, DMD, FAGD
Amish Desai, DDS, FAGD
Rebecca Orsini, DMD, FAGD
Jeffery Copeland, DDS, FAGD
Nahrain Y. Dinkha, DDS, FAGD
Phillip W. Moorad, DDS, FAGD

Illinois (Masters)

James Reichle, DDS, MAGD

The Illinois Academy of General Dentistry (IL AGD) would like to offer their sincere congratulations to the 2014 Fellows and Masters recipients, and to their families for providing the support and encouragement to reach this goal.

Dr. James Reichle, DDS, MAGD,
and his wife Lisa Salisbury

Illinois & Wisconsin Mastertrack Program

Sy Wachtenheim, DDS, MAGD

The Illinois Academy of General Dentistry in conjunction with the Wisconsin Academy of General Dentistry are pleased to present programs leading to Mastership certification in the Academy of General Dentistry. To complete the Mastership Program, candidates must enroll for 600 hours of FAGD/MAGD approved continuing education credit, 400 of which must be in of participation courses in the all the prescribed disciplines of dentistry.

E-Blasts will be sent with details of each course approximately 2 - 3 months prior to the course.

Who Should Attend? These hands-on programs were designed originally for AGD Fellows striving to be AGD Masters. We have since discovered that these programs can be valuable to all dentists from new graduates to the most experienced.

CE Credits: A total of 16 hours of participation credit will be awarded for those who attend a two-day lecture and hands-on course. A total of 38 hours of participation credit will be given to those who attend a two-day lecture and hands-on course, complete the assigned protocol in their office, AND return to document the protocol assignment.

Protocol Reporting Session: The reporting session for in-office protocols from previous Mastertrack sessions will be held at 5:00 PM on the Thursday before each Mastertrack program. We request that those wishing to report on protocols from past Mastertrack sessions notify Dr. Sy Wachtenheim at the contact below.

For further information please contact:
Sy Wachtenheim, DDS,
MAGD Mastertrack Coordinator
tzaner2@gmail.com or 847-858-1927

Registration will be online at ILAGD.org

IL and WI AGD 2014-2015 Mastertrack Courses

Advanced Treatment Planning— Many Recipes for Success

Dr. Richard Winter

September 12 - 13, 2014

8:00 AM - 12:00 PM Lecture and/or Participation
12:00 - 1:00 PM Lunch
1:00 PM - 5:00 PM Lecture and/or Participation

Location: Hootman Dental Lab
321 N. 4th Street, Rockford, IL 61107
815-964-8932

Speaker: *Dr. Richard Winter* graduated from the University of Minnesota School of Dentistry in 1988. He is an MAGD and a Diplomate of the ICOI. He is a Fellow in the Academy of Dentistry International, and the International College of Dentistry. Dr. Winter has published extensively on implant and reconstructive dentistry with emphasis on advanced treatment planning and has lectured throughout the United States.

Summary: Treatment planning is both an art and a science and may be extremely challenging! The difficulties we face require that we understand a patient's force factors, occlusion, and budget. This course will teach you how to discuss "dynamic treatment planning" with your patients. We will cover full mouth and segmental reconstruction, restorative, and implant treatment planning. The hands-on portion of the course will include reading a CBCT, manipulating and placing implants virtually and then drilling the planned cases on models with surgical guides. Whether you currently perform implant surgery, simply restore implants, or wish to do more complex cases with more confidence, this course will elevate your treatment planning confidence.

Illinois & Wisconsin Mastertrack Program

Course Objectives:

- Learn to treatment plan a case with Simplant
- Learn to do osteotomies with surgical guides
- Learn to do advanced planning for restorative options
- Learn sequencing care for optimal outcomes
- Learn CBCT planning
- Learn socket preservation
- Learn critical thinking and financial planning

Participation Course in Laser Dentistry - Standard Proficiency Certification Course

Dr. Robert Convissar

October 17 - 18, 2014

8:00 AM - 12:00 PM Lecture and/or Participation
1:00 PM - 5:00 PM Lecture and/or Participation

Hi-Point Dental Lab

5104 Tollview Drive, Rolling Meadows, IL 60008
888-880-6088

Speaker: *Dr. Convissar* is a pioneer in the field of laser dentistry, one of the first dentists to incorporate lasers into general practice. He has over 24 years of experience with CO₂, Nd, YAG, Diode, and Erbium wavelengths. Dr. Convissar is a Fellow of the American Society of Laser Medicine & Surgery, and a Master of the Academy of Laser Dentistry, where he holds Advanced Proficiency in Lasers.

Summary: The first day will detail laser use in the following subject matters:

- Non-surgical, surgical, & regenerative Periodontal therapy
- Surgical & restorative Implantology
- Fixed & removable prosthetics
- Oral Medicine/ Oral surgery/ Oral Pathology
- Pediatric & adolescent Operative dentistry
- Endodontics
- Pedodontics/Orthodontics
- Esthetic/Cosmetic dentistry
- Practice Management/ Marketing

Registration will be online at ILAGD.org

The second day workshop will give each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models. Real time videos of routine laser procedures will be part of the in-depth discussion of specific instrument settings and techniques for laser surgical procedures.

Course Objectives:

- Understand the science of laser dentistry
- Understand the difference in uses of the different laser wavelengths.
- Understand the utility & versatility of laser dentistry
- Understand how to integrate laser dentistry into your practice

Photography and PowerPoint Success

Dr. George Zehak

November 14-15, 2014

8:00 AM - 12:00 PM Lecture and/or Participation
12:00 - 1:00 PM Lunch
1:00 PM - 5:00 PM Lecture and/or Participation

Hi-Point Dental Lab

5104 Tollview Drive, Rolling Meadows, IL 60008
888-880-6088

Speaker: *Dr. George Zehak* received his dental degree from the University of Illinois in 1977. Currently he practices in Berwyn, IL and is on staff at Mercy Hospital in Chicago. He has presented many lectures on dental photography. Besides having a Mastership and Life

Crown & Bridge: The Complete Solution *Dr. Ron Kaminer*

April 17-18, 2015

8:00 AM - 12:00 PM Lecture and/or Participation
1:00 PM - 5:00 PM Lecture and/or Participation

Bisco Auditorium
1100 W. Irving Park, Schaumburg, IL 60193
847-534-6000

Speakers: *Dr. Kaminer* is a 1990 graduate from SUNY at Buffalo School of Dental Medicine with a practice in Hewlett, NY and one in Oceanside, NY. An international expert in the field of dental lasers, he evaluates dental materials for the Catapult Group, and sits on numerous advisory groups. He has lectured extensively and written many dental articles. He is a member of the ADA & AGD and lives in Hewlett.

Long Learning Award in the Academy of General Dentistry, he has received Fellowships from the International College of Dentists, American College of Dentists, Pierre Fauchard Academy, American College of Osseous Integration, The Odontographic Society of Chicago, and is Past President of the Illinois Academy of General Dentistry. He is currently Secretary of the Chicago Dental Society and Editor of the Academy of Dentistry International, U.S. Section.

Summary: Come and learn in one powerful course how to incorporate two important areas into your dental practice: photography and PowerPoint. Photography has become an essential part of your documentation and record keeping. In today's world, one must never start any dental case without having starting, in-progress, and final pictures of any treatment to the oral area. In fact, every area of dentistry and medicine involved. If ever asked to be accountable for any of your dental treatment, you will need to show pictures of treatment. This course will teach you fast, easy, and predictable photos for your documentation. It will teach you how to use today's most effective way to present it to your patients and colleagues.

Course Objectives:

- Learn the basics of a DSLR camera
- Learn how to set up an "office studio"
- Learn how to take quality Intraoral pictures
- Learn how to take portrait pictures of your patients
- Learn how to use PowerPoint
- Learn how to incorporate your patient's pictures into PowerPoint
- Learn how to Video-tape your patients.

Registration will be online at ILAGD.org

Summary:

For most general practitioners, crown & bridge represents the bulk of day-to-day dentistry. This program will methodically take the attendee on a journey to simplify fixed prosthetics. Through a thorough didactic, we will revisit old concepts, modernize them and show specific examples on how to apply all of this in clinical practice. A comprehensive hands-on program will be included to work with new materials and practice new techniques.

Course Objectives:

- A simple smart guide for smile design
- Bur selection for optimal preparations
- Build ups, posts, & more
- Simplified tissue management for ideal impressions
- Diode lasers & their place in crown & bridge
- Shade selection made easy
- Material choices for strength & esthetics
- Temporization made easy
- Rationale for cementation of current materials
- Predictable tooth whitening
- Scanning & milling

Illinois & Wisconsin Mastertrack Program

Oral Medicine - Review & Update

Dr. John Olsen

May 15 - 16, 2015

8:00 AM - 12:00 PM Lecture and/or Participation
1:00 PM - 5:00 PM Lecture and/or Participation

Hi-Point Dental Lab

5104 Tollview Drive, Rolling Meadows, IL 60008
888-880-6088

Speaker: *Dr. Olsen* was a member of the faculty at Marquette U. School of Dentistry in the Anatomical Sciences department for 12 years. He was the course director for General/Oral Pathology & Pharmacology at MATC for over 20 years collectively. He has lectured extensively. His awards from AGD include MAGD & LLSR. He is presently Regional Director for Region 9. He holds Diplomat status in ICOI.

Summary: This course is designed to update different treatment options and the proper use of our agents in Oral Medicine. We will focus on the uses of agents that control, cure, treat, modify, cure and physically alter problems in the head and neck. We will cover the agents and curative modalities to treat:

- Anxiety associated syndromes
- Pain:
 - Best ways to control it before, during and after treatment
 - Muscular trismus and trigger points
 - TMJ dysfunctional agony
- Infections - etiological agents - bacteria, fungi and viruses
- Pathological Influences:
 - Syndrome influencing oral pathological diseases from immunological syndromes.
 - Oral cancers
- Cosmetic Alterations:
 - Solving aging problems related to collagen breakdown
 - Decreasing creases & grooves around the mouth
 - Adding increased dimension to the lips

Course Objectives:

- Proper dosing and types of analgesics for oral & head and neck pain
- Best use of anesthetics and injection techniques for any and all of our many dental treatment therapies.
- Proper dosing and use of anti-anxiety agents
- Proper use of antibiotics
- Treatment of infections involving fungus, viruses, immunopathological syndromes & cancers
- Injection techniques involving use of Botox and fillers.

Future Dates:

Friday & Saturday, September 18 & 19, 2015

Dr. Neil Warshawsky

Hi-Point Dental Lab, 5104 Tollview Dr., Rolling Meadows, IL

Friday & Saturday, October 23 & 24, 2015

David Little

Assisted Removable Prosthodontics

Hi-Point Dental Lab, 5104 Tollview Dr., Rolling Meadows, IL

With Mastertrack programs, you can more than double the number of CE hours that you earn by doing the protocol (homework) assignment in your own office, documenting it with photographs and presenting a Power Point presentation at a Protocol Reporting session. The Protocol Assignment is given at the end of each Mastertrack Course. The Protocol Reporting sessions are on the Thursday before the Mastertrack program.

endorsement.

NORTHERN ILLINOIS COMPONENT President's Report

The IL AGD is working hard for you.

The Illinois Academy of General Dentistry is working tirelessly as your advocate in both the political and professional arena. We are committed to insuring that our patients receive the highest level of professional care. To meet this challenge, we actively support the role of the general dentist in such political and legislative issues as midlevel providers. We also dedicate ourselves to the dental community by providing quality educational programs. This helps to provide a better service to our patients, improve our practices and create a positive image to the people we serve.

The Northern Component strives to provide a wide variety of both lecture and hands-on dental courses. Our goal is to create an environment for extraordinary dental service to our communities.

Our courses are often limited to smaller groups of attendees, allowing you to interact with our speakers and have your questions individually answered. This also provides a great opportunity to network amongst our colleagues and other professionals.

Let's keep our profession strong. Meet the challenge by participating in and supporting the AGD.

The Clear Facts on Orthodontics: When, Why and How to React

Speaker: Neil Warshawsky, DDS, MS

Wednesday, September 10, 2014

Speaker Biography:

A Chicago native, Dr. Neil Warshawsky leads a world-class staff within his private practice, Get It Straight Orthodontics. Dr. Warshawsky is an Associate Professor of Orthodontics at the Craniofacial Center at the University of Illinois Health Center. With over 18 years of Cleft Palate Team experience and a vast knowledge of 3D imaging, he manages a large majority of the craniofacial cleft palate orthodontic cases. Dr. Warshawsky lectures to audiences around the world on a number of subjects including building clear aligners, Lingual Orthodontics, and the use of fixed skeletal anchorage for more efficient mechanics.

Course Description:

We will discuss the mixed dentition and the need for Phase I interceptive orthodontics, approaching orthodontics from a preventative point of view and learning to head off problems such as impacted teeth in a growing individual. We will stress the correction of crossbites and habits. Appliance design and treatment planning will be stressed. We will discuss the permanent dentition and focus on clear aligner therapy, including an understanding of how and why clear aligners work for some situations, but not for all. We will focus on using force points to control tooth movement.

Course Objectives:

- How to create and maintain space for erupting teeth
- Appliance design in the mixed dentition
- Learn to treatment plan the staging of tooth movement using a clear aligner

Immediate Provisionalization and Loading of Dental Implants at Placement: Keys to achieving natural soft tissue esthetics around dental implants while minimizing conventional treatment times

Speaker: Paul Petrunaro, DDS, MS

Friday, October 24, 2014

Speaker Biography:

Dr. Petrunaro received his DDS from Loyola Dental School and both a Certificate in Periodontics as well as a Masters of Science in Periodontics from Northwestern University Dental School. He has been awarded Fellowship by the American College of Dentists and the International College of Dentists and has been named a Diplomate in the International Congress of Oral Implantologists. Dr. Petrunaro is the founder and director of The Implant Learning Center, LLC.

Course Description:

This program will provide a comprehensive review of surgical and restorative principles necessary to predictably achieve aesthetics in single and multiple tooth implant restorations. The review will include ideal surgical stent design (The TempStent II™ method), minimally invasive implant placement, the immediate restoration of implants in single and multiple sites, and minimally invasive bone grafting techniques. Large multi disciplinary cases utilizing this philosophy will also be presented. Simplification of the entire implant surgical and prosthetic procedure is the main goal of this lecture.

Course Objectives:

- Recognize the parameters for implant sites that can lead to success with creating/maintaining natural emergence profiles
- Understand the importance of provisional restorations of the implant placement procedure to the final esthetic result of the implant restoration

Registration will be online at ILAGD.org

Chicago Component of the Illinois Academy of General Dentistry

Seminar Courses 2015

CHICAGO COMPONENT

- Recognize when to augment the soft tissues around the implant site at implant placement and procedures related to this protocol

Emergency Medicine for the Dental Office & CPR Recertification

Speakers:

Mohamed Harunani, DDS, MAGD & Mr. Michael Egan
Friday, March 13, 2015

Speaker Biography:

Dr. Mohamed Harunani received his DDS in 1986 from Northwestern University Dental School. He then completed a one year residency at Cook County Hospital with an emphasis in pediatric dentistry, oral surgery and hospital dentistry. After 20 years in private practice, he has collaborated with Midwest Dental and is now their Dental Director. Dr. Harunani has received numerous accolades and has held many positions within various dental organizations, presently that of Treasurer of the AGD. Mr. Michael Egan is the founder and principal partner of Lifelink EMS.

Course Description:

Dr. Harunani will discuss areas that are vital to a proper understanding of emergency medicine: prevention, preparation, recognition, and management. Included will be a discussion of preparedness and a thorough review of the office emergency kit. The CPR portion of the course will fulfill the dental licensing requirement. Upon completion, participants will receive an American Heart Association Healthcare Provider card.

Course Objectives:

- Understand the principles of preventing medical emergencies
- Understand the basic management protocol for medical emergencies
- BLS CPR Recertification for Healthcare Professionals

Registration will be online at ILAGD.org

Ten Things That Will Help My General Practice, Without Breaking the Bank: Overview of New Technologies with a Clear ROI

Speaker: *Parag Kachalia, DDS*
Friday, May 8, 2015

Speaker Biography:

Dr. Parag R. Kachalia is an Associate Professor and the Vice Chair of Simulation, Technology and Research and is a team leader within the University of the Pacific's prestigious complex and esthetic rehabilitation program. He is a fellow of the American Dental Education Association's leadership institute, researcher, as well as a published author in the areas of dental technology, digital diagnostics, contemporary fixed prosthodontics, and financial management. He has lectured internationally in the areas of adhesive dentistry, cosmetic dentistry, photography, CAD/CAM technology, fixed prosthodontics, treatment planning, erosion, and diagnostic technologies.

Course Description:

This is a lecture only course that will look at current advances that will aid the average general practice. The focus of this presentation will concentrate on technologies and materials that will improve efficiency, delivery of care, patient experience, and/or practice management. The bulk of the program will look at advances that require an investment of \$5,000 or less, yet generate a measurable return on investment.

Course Objectives:

- Identify key technological advances that will aid your practice on Monday morning.
- Learn strategies to use technology as a distinguishing factor from other practices.
- Gain an understanding of how technology investment can lead to a decrease in overall staff costs.

Registration will be online at ILAGD.org

CENTRAL ILLINOIS COMPONENT

President's Report

For those of you who have never attended a CIAGD meeting at SIUSDM in Alton, you have missed being a part of the greatest dental family you can imagine. This small meeting of the best people from around Central Illinois and surrounding states meet 3 times a year for great fellowship and dental education that I feel is second to none.

The Friday night dinner at Tony's, a local icon, is hard to beat. This relaxing evening is filled with camaraderie and is a great night out with the speaker and fellow participants. So join us at our next meeting. I look forward to meeting you there.

Dr. Curtis Mitchem, President CIAGD

*The Central Illinois Component of the IL AGD in collaboration with the SIU School of Dental Medicine is pleased to present continuing dental education programs leading to Fellowship and Mastership certification in the Academy of General Dentistry. These programs earn **16 hours** of participation credit for those who attend the two day lecture and hands-on course. A total of **38 hours** of participation credit will be given to those who attend the two day lecture, the hands-on course, complete the assigned protocol in their office, AND return to present the protocol assignment. The reporting session for in-office protocol presentations from previous courses will be held on the Thursday evening prior to the CE program. These hands-on programs were designed originally for AGD Fellows striving to be AGD Masters. However, these courses can be **valuable to all dentists** from new graduates to the most experienced clinicians. Participants are not necessarily in pursuit of the AGD Mastership Award, just in pursuit of excellence in dentistry!*
