

Dear Colleague,

It is with great pride that I introduce the Chicago Component of the Illinois Academy of General Dentistry's 2015-2016 Seminar Series! This season boasts a Member Benefit Year with a decrease in registration costs. IL AGD members will pay **only \$400** for a season pass. In addition, an added benefit for the November 13, 2015 lecture is in store with staff members having a \$90 admission and Hygienists having a \$100 admission. We return to Maggiano's in Oak Brook for their great food and ambiance and to share in the camaraderie with our peers. The 2015-2016 seminar series reiterates that ALL SEMINAR REGISTRATION WILL BE COMPLETED ENTIRELY ONLINE! This convenient method of registration allows for easy payment & immediate confirmation for all attendees at any time of day. Visit www.ilagd.org and click on Continuing Education/Chicago Component Events to register! As always, we encourage you to consider purchasing the 4-event Season Pass and save over individual event ticket prices. I look forward to seeing you at the seminars!

Sincerely,

William M Lawley, DDS, MAGD
2015-2016 Education Program Course Director
Chicago Component of the Illinois Academy of General Dentistry

Real World Implant Dentistry

Speaker: Joseph Kim, DDS

Wednesday, September 9, 2015

8:00 am to 4:00 pm (Registration at 7:30 am)

7 CE Lecture Credits

Westin North Shore, Botanic Garden Ballroom

601 N Milwaukee Ave, Wheeling, IL

ILAGD Annual Business Meeting - Election and installation of officers will be held before lunch at 11:45 am.

Speaker biography:

Joseph Kim, DDS graduated from the University of Michigan School of Dentistry in 2001. He has maintained a general practice in Yorkville and Sugar Grove, where he has focused on sedation and implant dentistry. Since 2008, Dr. Kim has trained hundreds of dentists in implant surgery and restoration, with support from various implant and dental materials manufacturers. Additionally, Dr. Kim operates an in-house dental laboratory which provides unique implant prosthetic solutions to clinicians across the country. He is the Illinois and Michigan Course Director for Hiossen's AIC Basic and Intermediate Implant Courses, and Clinical Director at Modern Implant Institute, which provides continuing education in advanced implant and grafting topics.

Course description:

Implant dentistry continues to be one of the hottest fields in dentistry, but with its popularity, more problems seem to arise than are solved. For example, clinicians are bombarded daily with manufacturer claims of superiority, and are lead to believe that certain products or procedures are more predictable than others. Also, surgical specialists may limit restorative options by placing implants in surgically convenient positions or by avoiding certain augmentation procedures. In this course, we will address these and other questions from both evidence based and anecdotal perspectives. Topics covered include treatment planning, treatment presentation, prosthetic options and alternatives, tissue augmentation, impression techniques, abutment selection, delivery of cement retained restorations, and more.

Course objectives:

- Understand the importance of approaching implant dentistry as a prosthetically driven discipline
- Learn to present treatment options successfully
- Be aware of prosthetic options for common situations
- Recognize the limits of predictable grafting procedures
- Understand the importance of taking appropriate implant records
- Distinguish between stock, custom, and CAD/CAM abutments
- Learn how to deliver fixed prostheses appropriately

Integrating the Team and Creating the Value

Speaker: Lou Graham, DDS

Friday, November 13, 2015

8:00 am to 4:00 pm (Registration at 7:30 am)

7 CE Lecture Credits

Maggiano's Little Italy

240 OakBrook Center, Oak Brook, IL. 60523

Speaker biography:

Dr. Graham is an internationally recognized lecturer extensively involved in continuing education for dental professionals. His lectures focus on incorporating current clinical advancements through "conservative dentistry." Dr. Graham is the founder of the Cata-pult Group, a continuing education company whose philosophy and programs use contemporary, interactive formats to integrate time-proven conservative dentistry with 21st century materials and techniques. Dr. Graham is a published author in many leading national and international dental journals. Dr. Graham is a graduate of Emory Dental School. He is the former Dental Director of the University of Chicago's Department of Dentistry.

Course description:

The essence of this course is all about integrating "your" practice's philosophical approach to dentistry amongst your entire team allowing for seamless interactions. Your initial exams, periodic exams, periodontal exams, oral cancer screening exams, x-ray protocols, diagnostic approaches, and communication skills all must be consistent to allow your practice to maximize value. This course will highlight a day in practice, demonstrating some of the latest techniques and truly maximize what you can be doing each day to become a recession proof office. This course is recommended for doctors and their staff.

Course objectives:

- Understand what "your" philosophy is.
- Learn how hygiene growth is the number 1 driver to overall growth and the essence of your practice.
- Learn why the "wheel" defines consistency and communication between the doctor and hygienist.
- Understand the latest in diagnostics for the hygienist/doctor team and why these new technologies provide you with so much more information and equally, allow you to show and deliver far more diagnostically driven outcomes.
- Learn combination treatment plans that integrate hygienist and doctor.
- Understand prevention at every age and customize your protocols.
- Learn the latest in rinses, toothpastes, gels and how to treat areas from chronic halitosis to refractory periodontal patients.
- Understand specific casework on patients 65 and beyond.

Simplifying Removable Prosthodontics

Speaker: Nels Ewoldsen, DDS, MSD

Friday, March 18, 2016

8:00 am to 4:00 pm (Registration at 7:30 am)

7 CE Lecture Credits

Maggiano's Little Italy

240 OakBrook Center, Oak Brook, IL. 60523

Speaker Biography:

Nels Ewoldsen earned his DDS from Indiana University in 1978 and while maintaining a full-time private practice in rural Indiana earned his MSD (Dental Materials & Prosthodontics) in 1994. A full time dental educator from 1994-2000 he taught removable prosthodontics and dental materials at the University of Nebraska and holds a faculty appointment at Indiana University School of Dentistry in Indianapolis. Dr. Ewoldsen served as clinical research director for Dentsply's Prosthetics Division and has contributed to material and technical developments for various dental companies.

3-Appointment Conventional & Digital Complete

Dentures (Morning): This 3-hour presentation reviews Massad-impresioning while introducing other options for expediting complete denture impressoning. Pre-manufactured templates, chairside constructed preforms as well as digitally created prototypes can establish tooth position and quickly record jaw relationships saving valuable chair time.

Course Objectives (Morning):

- Border-molded impression with stock trays and silicone, capturing all supporting structures and landmarks for complete dentures.
- Provide customized template occlusion rims communicating midline, foxline, tooth display, and phonetics.
- Identify, prescribe, and adjust a lingualized denture occlusion.
- Learn effects of the denture manufacturing process on delivery procedures for "digital" dentures compared to traditional dentures.

Conventional & Digital Partial Dentures: Designs, Materials, Tooth Preservation (Afternoon):

The lecture features an historical overview of removable partial denture (RPD) concepts, design principles and materials with emphasis on evidence-based successes and failures. From conventional materials to CAD/CAM technologies, this presentation assists dentists in selecting and designing optimal RPDs using metals, acrylics, polyamides, polycarbonates, acetal resins and polyarylk-etones, dentistry's latest super-polymer.

Course Objectives (Afternoon):

- List problems associated with "nylon" partial dentures.
- Describe advancements brought about by CAD manufacture of removable partial denture (RPD) frameworks.
- Learn effects of selective laser melting on cobalt-chromium alloys
- Compare and contrast PEEK, with hot-pressed polymers such as nylon, polycarbonate, and acetal resins.

Ideal Restorative Materials & Techniques for Long-term Success

Speakers: Dr. Paul L. Child Jr., Dr. Rolando Nunez, & Dr. Byoung I. Suh

Friday, May 13, 2016

8:00 am to 4:00 pm (Registration at 7:30 am)

7 CE Lecture Credits

Maggiano's Little Italy

240 OakBrook Center, Oak Brook, IL. 60523

Speaker Biographies:

Dr. Paul L. Child Jr. is a Prosthodontist and Certified Dental Technician. He focuses on Prosthodontics, esthetics, implants, complex restorative, CAD/CAM, and all aspects of surgery. Dr. Child is the former CEO of the CR Foundation (formerly CRA). His lectures emphasize new and emerging technologies, prosthodontics, adhesives, cements, implants, and surgery.

Dr. Rolando Nunez received this dental degree from Central University of Venezuela in 1997. He enrolled in a Biomaterials Graduate Program at the University of Alabama at Birmingham, obtaining a MSc. degree in 2004. In 2014, he became Manager of Clinical Affairs for BISCO Inc. He has many publications regarding clinical techniques as well as scientific articles in peer reviews.

Dr. Byoung Suh founded Bisco, Inc. in 1981. In addition to his dental materials research, he has published over 150 articles. Dr. Suh has become a well-known and sought after lecturer and teacher, having given more than 200 lectures and presentations worldwide at various dental associations and research conventions.

Course Description:

In adhesion dentistry, it is critical for clinicians to understand the science behind adhesive and restorative materials in order to be able to select the best material for each restoration and implement proven techniques in their practice. We will discuss the latest developments in adhesive dentistry, bioactive dental materials, the best techniques and materials to cement an all-ceramic crown or veneer, as well as the ideal dental materials and techniques. These and other adhesion and restorative principles will be addressed. Topics will include: direct & indirect pulp-capping, resin-based composite restorations, post & cores, cementation, and indirect restorative materials & techniques for veneers, onlays, and crowns.

Course Objectives:

- Introduce classifications of bonding agents, advantages & limitations of different generations; learn new directions of adhesives.
- Understand the issues of adhesion incompatibility with some composites/cements, and the differences between the dual-cured luting cements on the market.
- Learn how to select the proper materials & techniques when bonding different types of indirect restorations, including glass ceramic and zirconia substrates.
