MACdentistry: The What, When, How, and Why of Current Indirect Restorative Materials, Adhesives, and Cements

Course Description:

As restorative materials, adhesives, and cements, continue to evolve, change, and improve it becomes more difficult for restorative dentists to keep up with the latest advances. With increasingly higher patient expectations for long term clinical success, it is important that the dentist have an understanding and working knowledge of these materials in order to make sound decisions. This half day lecture will discuss factors affecting the selection of indirect restorative materials that will satisfy the aesthetic and functional goals of the patient as conservatively as possible. Cases will be used to demonstrate the use of these materials, bonding agents, and cements in different clinical situations.

Learning Objectives:

- The factors affecting material selection.
- Monolithic vs. layered restorations.
- Combining aesthetics and function with emax lithium disilicate.
- Advantages and disadvantages of full contour zirconia.
- The benefits of the new universal adhesives.
- Which cements to use when and why.
- How to treat the tooth and the restoration when conventionally cementing or adhesively bonding.
- The long term benefits of bioactive cements.

Material selection and color of the tooth will determine: • Amount of tooth preparation • Margin design and placement Factors Affecting the Selection of an Appropriate **Restorative Material** · Aesthetic goals for the patient • Functional requirements of the restoration • Color of the tooth or substructure being restored • Location of the tooth (anterior vs. posterior) • Single unit or bridge • Cement or bond • Previous experience All teeth should be restored with the

All teeth should be restored with the most conservative restoration that satisfies the patient's esthetic and functional requirements.

Frank M. Spear, DDS, MSD

Vol. 1, No. 4

| Ideal Restorative Material | |
|---|--|
| Aesthetic (ability to mimic natural tooth) Translucency Opalescence | |
| Fluorescence 2. Strong (ability to withstand occlusal forces) | |
| High flexural strength High fracture toughness | |
| High compressive strength High tensile strength High sheer strength | |
| | |
| | |
| | |
| | |
| Ideal Restorative Material | |
| Aesthetic (ability to mimic natural tooth) | |
| Strong (ability to withstand occlusal forces) Biocompatible Color stable | |
| Kind to opposing dentition Not easily abraded | |
| 7. Low solubility in the presence of oral fluids 8. Ease of fabrication | |
| 9. Predictability of results 10. Versatile | |
| | |
| | |
| | |
| | |
| Matarial Outions | |
| Material Options | |
| Monolithic Restorations (uniform in structure throughout the restoration) | |
| Layered Restorations (requiring a core or | |
| framework and a veneering ceramic) | |
| | |
| | |
| | |

| Monolithic Materials Powder/Liquid Glass Ceramics (60-100 MPa) Ceramco 3 (Dentsply) Creation (Jensen) Heat Pressed Leucite Reinforced Glass Ceramics (120-160 MPa) IPS Empress (Ivoclar Vivadent) Authentic (Microstar) Milled Feldspathic and Leucite Reinforced Ceramics (120-160 MPa) Vitablocs Mark II (Vident) IPS Empress CAD (Ivoclar Vivadent) Milled Resin Nano Ceramic (200 Mpa) Lava Ultimate (3M ESPE) Milled and Pressed Lithium Disilicate Glass Ceramics (360-400 MPa) IPS emax Cad and Press (Ivoclar Vivadent) Milled High Strength Crystaline Ceramics (900-1200 MPa) | |
|---|--|
| Runzir solid zirconia (Glidewell) Lava Plus (3M ESPE) | |
| Characteristics of Monolithic Materials • Aesthetic • Often require less tooth reduction • Often can be used with supragingival margins • Possess a glass matrix that enables them to be bonded to tooth structure (except zirconia) • Glass ceramics more translucent but poor at masking • Zirconia and lithium disilicate have ability to mask dark teeth | |
| Advantages of Minimal Preparation • Most conservative • Predictability of bond to enamel • Less risk of sensitivity • Supragingival margins can be utilized • Less flexibility under loading | |

Situations Requiring Enamel and Dentin Replacement

- Interproximal restorations or decay
- Discoloration
- · Malposition of teeth
- Loss of tooth structure due to wear, erosion, or fracture

Clinical Situations for Using Monolithic Materials (Anterior and Posterior)

- Enamel Replacement (minimal or no prep veneer)
- Enamel and Dentin Replacement (3/4 crown or veneer-crown)
- Anterior Crown
- Posterior Crowns and Anterior 3-unit Bridges (Lithium Disilicate)
- Posterior crowns and bridges (zirconia)

Advantages of Lithium Disilicate as a Monolithic Material

- Strength (360-400 Mpa)
- Can be pressed or milled
- Versatility can be used for veneers, thin veneers, crowns, anterior bridges, inlays, onlays, and implant restorations
- Ease of fabrication
- Can be bonded or cemented
- Most aesthetic of the higher strength materials especially when cut back and layered

| | | |
| | | |

Advantages of Zirconia as a Monolithic Material

- Strength (900-1200 Mpa)
- Less occlusal clearance necessary
- Can be used with feather edge margins
- More aesthetic than metal
- Functions well under heavy occlusal loads
- Ease of fabrication
- Can be cemented or bonded for increased retention

Cementing And Adhesive Bonding Options

- Zinc Phosphate
 - Hy-Bond (Shofu Dental)
- Zinc Polycarboxylate Durelon (3M ESPE)
- · Glass Ionomer
 - Ketac Cem (3M ESPE)

Protocol for Total Etch Adhesive Bonding of Glass Ceramics with Light Cure Resin Cement

- · Isolate with rubber dam and disinfect prepared teeth
- Place phosphoric acid gel, rinse, leave teeth moist
- Apply bonding agent, evaporate solvent, and light cure
- Place resin cement on teeth and seat all the restorations
- Clean excess cement with gauze, cotton rolls, and brushes
- · Tack restorations at gingival margins
- Floss interproximal contacts and light cure
- · Remove cured cement on facial with scaler
- Polish interproximal contacts with finishing strips
- Adjust occlusion where necessary and polish with rubber points and polishing paste

Unique Features/Benefits Of All Bond Universal

Flexibility of Technique: self etch, total-etch, or selective-etch procedures

- High bond strengths to all indirect substrates, including metal, glass ceramics, zirconia, alumina, and lithium disilicate.
- Designed to be fully compatible with light-cured, self-cured and dual-cured composite and luting cements Low film thickness (less than $10\mu m)$
- · No additional activator required

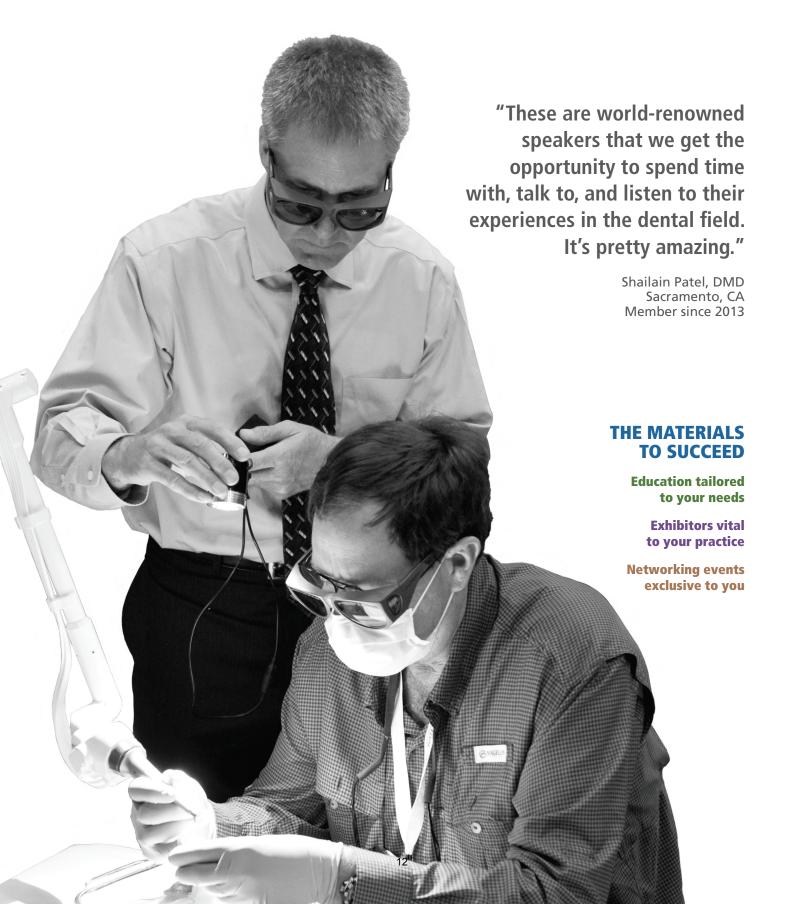

| | - |
|---|---|

THE PREMIER MEETING FOR GENERAL DENTISTRY AGD 2017

Be Aware of Wear: A Systematic Approach to Diagnosing, Treatment Planning, and Restoring the Worn Dentition

Course Description:

In today's society tooth wear is more prevalent than ever and it is therefore incumbent upon the entire dental team to be well versed in recognizing the clinical signs of wear while understanding the importance of prevention when possible and the restorative options when necessary. This half day lecture will illustrate the different types of tooth wear with clinical examples, and demonstrate a systematic approach to diagnosis and treatment.

Learning Objectives:

- Recognize the clinical signs of intrinsic and extrinsic erosion.
- Office protocols to help patients prevent and/or treat acid erosion.
- Recognize the clinical signs of horizontal and vertical wear patterns.
- Designing an occlusal scheme that fits and grinding patterns of the patient.
- Bite opening vs. crown lengthening vs. orthodontic intrusion to gain space for restorations.
- The importance of an interdisciplinary team in treating wear cases.
- A systematic approach in the treatment of simple to complex wear cases.

| Definitions |
|--|
| Attrition Tooth wear resulting from contact between opposing teeth. |
| Erosion A gradual tooth-surface loss process caused by an electrolytic or chemical mechanism without bacteria being involved. The acids causing the erosion may be extrinsic or intrinsic in nature. |
| Abrasion The wearing away of the tooth's outer covering caused by mechanical forces from a foreign object. |
| |
| Definitions (cont.) |
| Abfraction The wedge-shaped lesions in the cementoenamel junction area. Tooth flexure caused by eccentric occlusal forces during horizontal movements has been proposed as the etiology. Demastication The physiologic wearing away of teeth during chewing. (functional wear) Etiology of Tooth Wear Daniel A. Paesani Quintessence Publishing 2010 |
| Abrahamsen Definitions |
| |
| Abrasion Bruxism |
| Toothpaste Abuse |
| Erosion |
| Regurgitation Coke-swishing |
| Fruit-mulling |

Thomas C Abrahamsen, D.D.S., M.S.

Dzakovich Conclusions Laboratory studies have not been able to reproduce lateral stress induced lesions Toothbrush without dentrifice has not been able to reproduce cervical lesions Toothbrush with dentrifice and vertical brush strokes has not been able to reproduce cervical Toothbrush with dentrifice and horizontal brush stokes has reproduced cervical lesions identical to abfractions Work of Abrahamsen and Dzakovich Conclusions: • "Toothbrush Abrasion" is an incorrect term • "Toothbrush Recession" occurs • "Toothpaste Abrasion" occurs • "Abfraction" due to lateral occlusal forces is doubtful • "Abfriction" is primarily related to toothpaste and horizontal brushing

Characteristics of Attrition

- · Wear facets match
- Wear is located in areas of contact
- Wear facets have sharp edges
- Wear of enamel and dentin is even

| Additional Clinical Signs | |
|---|---|
| Fractures of teeth and/or restorationsTooth MobilityPulpal Necrosis | |
| Masticatory Muscle Hypertrophy Tongue Indentations | |
| | |
| | |
| | |
| Characteristics of Erosion | |
| Wear in locations of no occlusal contact Wear facets are dull with dentin cupped and | |
| rounded • Acid will erode tooth structure but not restorations | - |
| | |
| | |
| | |
| Key Point | |
| | |
| In the presence of acid teeth are more easily abraded and wear facets may be present | |
| abraded and wear facets may be present | |

Treatment Options

- Diet Counseling
- Appliance (night)
- Equilibration (with or without composite)
- Direct Composite (esp. with acid erosion)
- Trial Therapy (splint, composite, provisionals)
- Indirect Restorations

Key Points

- 1. Patients must recognize their tooth wear as a problem and understand the long term consequences before they will accept treatment
- 2. Wear cases are often difficult to treatment plan because as teeth wear they move
- 3. Most wear cases almost always have more than one treatment option

How To Treat

- Diagnosis acid erosion caused by esophogeal reflux or attrition with a vertical wear pattern due to a constricted envelope of function
- Treatment Goals restore worn teeth, increase incisor length, correct gingival asymmetry, improve smile aesthetics, restore function, etc.
- Treatment Plan crown lengthen to correct gingival asymmetry and increase incisor length, porcelain veneers or crowns to restore worn teeth and improve smile aesthetics and function
- Sequencing perio, ortho, endo, restorative

Developing the Treatment Plan

- Aesthetic Component
- Functional Component
- Structural Component
- Biologic Component

Developing the Treatment Plan What Happens When Teeth Wear

- Aesthetics teeth get shorter decreasing incisal display teeth erupt causing gingival asymmetry and occlusal plane disharmony
- Function (occlusion) in horizontal wear overbite and overjet are lost as well as anterior guidance in vertical wear overbite increases and overjet decreases
- Structural there is often less tooth structure available to be restored and usually a lack of room for restorations
- Biologic periodontal health is usually good, but endodontic and crown lengthening procedures are often required

| Aesthetic Component |
|---|
| Incisal Edge Position |
| Tooth Display established intra-orally with mock-ups, |
| Gingival Levels provisionals, etc.ly |
| Functional Component |
| Ant. Guidance |
| Overbite and Overjet determined with a diagnostic wax-up on |
| Occlusal Planes mounted models |
| Structural Component (options to gain structure and/or space) |
| Orthodontic Intrusion or Extrusion |
| Periodontal Crown Lengthening |
| Bite Opening |
| Endo with Post and Core |
| Orthognathic Surgery |
| Biologic Component |
| Periodontal Health |
| Pulpal Health |

Acid Erosion

2 Types of Acid Erosion

Intrinsic (regurgitated stomach acid)

- Gastroesophogeal Reflux (GERD)
- Bulimia

Extrinsic (ingested acid)

- Beverages
- Citrus Fruits

Options for Gaining Space

Crown lengthening

Orthodontic intrusion

Bite opening

Reasons for Altering Vertical Dimension

- To improve aesthetics
- To improve occlusal relationships
- To gain space for restorations

| | _ |
|--|---|

| | |
| | |

Clinical Signs of Extrinsic Erosion

Beverages (carbonated, sports, and energy drinks)

- 1. Poolers wear on occlusals of mandibular posteriors
- 2. Swishers facial erosion on maxillary anteriors

Citrus Fruits

- 1. Citrus
- 2. Fruit suckers anterior facial and lingual erosion
- 3. Citrus fruit mulling more posterior wear than anterior Frank Spear DDS, MSD

Additional Risk Factors for Acid Erosion

- Acidic foods (healthy diets)
- Occupational hazards
- Sustained recreational drug use
- · Low salivary flow

Prevention of Erosion

- · Avoid or reduce direct contact with acids
- Increase acid resistance with fluoride therapy
- Utilize the benefits of calcium and phosphates
- Provide proper tooth brushing instructions
- · Monitor salivary flow
- Make medical referrals when necessary

| cases especially when acid source can be eliminated or prevented | |
| · | |
| | |
| | |
| | |
| | 1 |
| Dysfunctional Wear | |
| Parafunction - grinding patterns caused by | |
| the occlusion most likely due to interferences or instability | |
| Bruxism – grinding most likely initiated by the CNS resulting in patients that will continue to | |
| grind even after treatment Frank Spear DDS, MSD | |
| · | |
| | |
| | |
| Trial Therapy | |
| Appliance – check for wear patterns | |
| Equilibration – in conjunction with composite bonding – check for breakage | |
| Provisionals – patient has accepted treatment – evaluate for evidence of wear | |
| | |
| | |

Attrition

- $\begin{array}{c} 2 \ Types \ of \ Wear \ Patterns \\ \text{1. Horizontal wear is broad and flat with facets on incisal} \end{array}$ edges and cusp tips and a loss of overall tooth length horizontal wear patterns are usually less predictable to treat (cow)
- 2. Vertical wear is present on the facial surface of the mand. anterior teeth and the lingual of the max. anteriors and is usually associated with a deep overbite - vertical wear patterns are often more predictable to treat (rat)

Goals of Treatment for Horizontal Wear Patterns

Design an occlusion and restorations that fit the grinding patterns of the patient

Minimize overbite Shallow guidance Group function (bruxers)

Key Point

In protrusive wear pattern, design bite to have mesial of the mandibular premolar contact the distal of the maxillary canine to help share the load so patient wont push with as much force

Goals of Treatment for Vertical Wear Patterns

Design an occlusion and restorations that fit the grinding patterns of the patient (use of an incisal guide table is often beneficial)

Increase overjet

Decrease overbite

Options for Leveling the Occlusal Plane

Crown lengthen and shorten

Orthodontic intrusion

Raise the posteriors

Key Point

Which teeth need restorations will often dictate the treatment plan

AGD Member Benefits

The Academy of General Dentistry (AGD) is the only organization that exclusively represents the interests and serves the needs of the general dentist. Start taking advantage of our member benefits today—join the AGD by visiting www.agd.org or calling 888.AGD.DENT (888.243.3368).

Continuing Education

Discover quality continuing education (CE) opportunities—at both the local and national level, and in a variety of formats—to help you provide the best patient care, learn about the latest technologies and procedures, and emerge as the educated voice of general dentistry. Plus, you can submit CE to the AGD in a variety of convenient ways—via the Web, email, mail, or fax—and we'll track your courses with our members-only CE transcripts.

Achievement Awards

Stand out among the competition, gain instant credibility in your profession, and establish your commitment to lifelong learning and quality patient care with the prestigious AGD Fellowship and Mastership awards, the only achievement-based awards in general dentistry.

Advocacy and Representation

Join the organization that serves as the voice of general dentistry. The AGD ensures that general dentists and supporters of the profession can speak up when it matters most, helping members unite their voices on legislative and regulatory activities affecting their right to practice within the United States.*

Annual Meeting

Take advantage of discounted registration to the AGD's annual meeting, where you can earn CE, checkout the latest products and technology, and network with your colleagues.

Practice Tools

Access a variety of tools to help you manage your practice more efficiently: Check the AGD Product Review Directory before you buy, download sample consent, employee, and practice policy forms from the AGD's Practice Management Library, and get personalized assistance with third party payer problems, as well as free insurance contract analysis.

Career Tools

Take advantage of the AGD Marketplace & Career Center, where dental connections are made. Search available job listings, buy a practice or equipment, post your own résumé at no cost, and find additional resources to help you plan for your next career move.

Patient Resources

Get enrolled in the Find an AGD Dentist directory, which is searchable by prospective patients through KnowYourTeeth. com, the AGD's consumer-facing website. You also may direct your current patients to learn more about their oral health through <code>www.2min2x.org</code>, an educational website created by the Partnership for Healthy Mouths, Healthy Lives—of which the AGD is a proud member—and the Ad Council. Plus, offer educational reading materials in your waiting room with AGD oral health fact sheets, which cover a range of topics and are customized with your practice information.

Publications and Media

Stay informed on the latest general dentistry news and research with complimentary subscriptions to the AGD's award-winning print publications, *AGD Impact* and *General Dentistry*, along with extra content available exclusively in the digital editions. You also can listen to the AGD Podcast series and read our blog, *The Daily Grind*.

Member Savings

Receive immediate access to the AGD Member Savings & Offers program, which provides you with exclusive savings and special offers on the personal and professional products and services you need most.

*Canadian dues rates reflect limited advocacy benefits.

Dear Colleague,

It is with great pride that I introduce the Chicago Component of the Illinois Academy of General Dentistry's 2016-2017 Seminar Series! We are excited to announce that we are going to offer the same decrease in registration costs as last year as an AGD Member Benefit. AGD members will pay only \$400 for a season pass, which will include ALL FOUR COURSES. In true Chicago spirit, we will be returning to Ditka's Restaurant in Oak Brook Terrace to network with our dental colleagues while enjoying their phenomenal food and ambiance. Once again, The 2016-2017 seminar series registration will be completed entirely online. This convenient method of registration allows for easy payment and immediate confirmation for all attendees at any time of day. Visit www.ilagd.org and click on Continuing Education/Chicago Component Events to register! As always, we encourage you to consider purchasing the 4-event Season Pass and save over individual event ticket prices. I look forward to seeing you at the seminars!

Sincerely,

Kate Limardi DDS 2016-2017 Education Program Course Director Chicago Component of the Illinois Academy of General Dentistry klimardi@gmail.com

Register online at www.ilagd.org

Registration is online at ilagd.org

Cutting Edge Technology with Digital Design and Real World Cosmetic Dentistry; Faults, Failures, and Fixes

Speaker: Joyce Bassett, DDS

September 23, 2016 7:30am-4:00pm (Registration at 7:30 am) Ditka's Restaurant

2 Mid America Plaza, #100, Oakbrook Terrace, IL

Dr. Bassett practices comprehensive restorative and aesthetic dentistry in Scottsdale, AZ. She is President and an Accredited Fellow of the American Academy of Cosmetic Dentistry.
She is an Associate member of the American Academy of Esthetic Dentistry, a KOIS mentor, an active member in the Academy of Fixed Prosthodontics and a

Fellow in the AGD. Dr. Bassett is adjunct faculty where she has taught the aesthetic continuum at the Arizona School of Dentistry. She was voted Top 5 female CE educators. She is an international lecturer, published author and is a member of the editorial board of several peer-reviewed publications. She is a recipient of the Volunteer Dentist of the Year award for Arizona CASS dental clinic and has received the Give Back a Smile volunteer service award twice.

Course Description:

Failures in dentistry are frequently blamed on materials, but many times operator error is the culprit. This innovative course will focus on aesthetics that are BUILT TO LAST. Clear, systemized techniques will be presented to treat cases involving veneers, crowns and implant restorations. These protocols will increase profitability by preventing failures that occur day-to-day in your office.

New preparation techniques that will simplify difficult space management cases will be presented, along with how to handle shade challenges and master digital photography. A clinical update on adhesive technology and ceramics will be presented, along with dimensions of color and anatomic stratification of anterior composite to attain a polychromatic imperceptible result.

Aesthetic and functional parameters of incisor position and morphology, dental facial treatment planning, determination of vertical dimension, and bite force management will be presented as components that allow comprehensive restorative treatment.

Predictable Low Stress Endodontics for the General Practitioner

Speaker: John C. Flucke, DDS

November 4, 2016 7:30am-4:00pm (Registration at 7:30 am) Ditka's Restaurant

2 Mid America Plaza, #100, Oakbrook Terrace, IL

Dr. John Flucke is in private practice in Lee's Summit, Missouri. He serves as Technology Editor for Dental Products Report magazine as well as Chief Dental Editor where he writes, edits, and does video demos of products featured in his "Technology Evangelist' columns.

Dr. Flucke has one of the most popular dental blogs on the Internet, "The Dental Technology Blog," featuring daily updates on technology in health care.

Dr. Flucke uses technology in every aspect of his practice and personal life. He loves testing the latest gear he can get his hands on. He lives his life by the motto "you can't have too many toys". He also consults with manufacturers helping with development of techniques, technologies, and products which allows him to see things from the "duct tape stage" all the way through to the completed item. Dr. Flucke graduated from the University of Missouri - Kansas City with a BA in Psychology as well as his DDS. He is a past president of the Greater Kansas City Dental Society as well as serving as the Missouri State Peer Review Chairman.

Course Description:

In this exciting hands-on course, Dr. Flucke will help you discover how to make endodontics predictable, profitable, and low stress. He will cover topics such as: diagnosis, canal location, instrumentation, irrigants, intra-canal medicaments and obturation. As a general practitioner Dr. Flucke understands the endodontic challenges faced by other "in the trenches" General Practitioners. This course will help you realize how manageable endodontics can truly be.

Course Objectives:

- Gain understanding of proper case selection
- Learn diagnostic techniques
- Discover Isolation tips and tricks
- · Learn revolutionary instrumentation techniques
- Compare irrigation choices and delivery
- · Discover effective obturation techniques

THE END – of Complications, Sensitivity, Discomfort & Open Contacts Morning Session

Speaker: Todd Snyder, DDS

March 3, 2017 7:30am-4:00pm (Registration at 7:30 am) Ditka's Restaurant

2 Mid America Plaza, #100, Oakbrook Terrace, IL

Dr. Todd Snyder received his doctorate in dental surgery at the University of California at Los Angeles School of Dentistry. He has trained at the F.A.C.E. institute for complex gnathological (functional) and temporomandibular joint disorders (TMD). Dr. Snyder is an Accredited Member of the American Academy of Cosmetic Dentistry.

Dr. Snyder has been on the faculty at U.C.L.A. and is currently on the faculty at Esthetic Professionals. He also founded and is CEO of Miles To Smiles, a non-profit children's charity that helps indigent and underprivileged children.

Course Description:

The days of sensitive teeth, discomfort or open contacts upon placing a permanent restoration should be gone in our offices. Today's program is going to provide practical solutions utilizing various materials to solidify The End of your restorative complications.

Course Objectives:

- Preparation techniques to instill greatness
- Perfect occlusion with minimal to no adjustment
- · Composite placement techniques that rival nature
- · Impression techniques to get it right the first time!
- Glass ionomer applications to eliminate headaches

New Tools in Modern Marketing (The Peanut Butter & Jelly Method) Afternoon Session

Course Description:

Learn facts about modern marketing techniques to market one's practice over the internet. The program will show how to create a web presence that people notice. Create brand identity, public awareness and popularity. Gain a huge advantage over competitors by setting up different internet accounts and tracking them daily.

- No-cost marketing with a high return
- Improved visibility on the internet
- · Increased new patient flow

Conquer the Kids and Win the Family

Speaker: Carla Cohn, DMD

May 5, 2017 7:30am-4:00pm (Registration at 7:30 am) Ditka's Restaurant

2 Mid America Plaza, #100, Oakbrook Terrace, IL

Dr. Cohn graduated from the Faculty of Dentistry at the University of Manitoba in 1991. She then went on to complete a post graduate internship in Children's Dentistry at Health Science Centre Children's Hospital.

Dr. Cohn was alarmed at the rampant tooth decay she encountered in very

young children, despite all of the knowledge available on prevention. Today her ground breaking private practice at Kid's Dental, focuses on prevention.

Dr. Cohn holds an appointment at the University of Manitoba, Faculty of Dentistry, and the Dean's Advisory Board at the University of Manitoba. She has surgical privileges as a shareholder at Western Surgery Centre. and has lectured extensively on risk assessment, prevention, behavior management and restorative treatment.

Course Description:

Learn strategies to complete infant and toddler examination. Address many frequent patient and parent concerns. This course will provide you with everything you need to know about risk assessment for childrenincluding patient questionnaires and clinical testing. A "tool box" of preventive strategies will be presented.

Keep the kids and their parents IN your practice. This course will give you practical points on how to treat your little patients well. Restorative treatment options and their clinical indications will be presented. Indications for glass ionomer, composite, and aesthetic full coverage in anterior and posterior teeth will be demonstrated. You've heard it before - treat the kids well and your practice will thrive.

Course Objectives:

- Treat caries as an infectious disease
- Complete a risk assessment
- Provide a wide range of preventative therapies

Registration is online at ilagd.org

About the Speaker:

Dr. Joseph Kim

Joseph Kim, DDS, JD, received his dental training from the University of Michigan. He maintains a general practice in Yorkville and Sugar Grove Illinois, focusing on full arch implant therapy, as well as receiving referrals for both implant and sedation dentistry from the Chicagoland area. Since 2008, he has trained hundreds of dentists in implant surgery and restoration, with support from various implant and dental materials manufacturers. Dr. Kim also owns and operates an implant dental laboratory, giving him a unique perspective on the state of the art in implant prosthetics.

NORTHERN ILLINOIS COMPONEN

Full Arch Implant Therapy

Over the past several decades, implant dentistry has become a welcome modality as an alternative to conventional prosthodontics, especially in situations where traditional methods cannot provide adequate restorative solutions. This is particularly true for edentulous patients in need of implant assisted full arch or full mouth rehabilitation, as well as, partially edentulous patients whose remaining dentition are not in mechanically optimal positions. Despite its promise, restorative dentists avoid certain full arch implant solutions, often due to inadequate patient communication and lack of experience. Conversely, there is a disturbing trend to push patients to remove otherwise healthy teeth and their supporting structures in favor of one size fits all hybrid prostheses. This course will explore the benefits and limitations of fixed and removable treatment options in the context of full arch reconstruction. Special attention will be paid to common problems and how to avoid and address them. This course is appropriate for surgical and restorative clinicians who want to better understand and implement full arch fixed and removable implant therapy in their practices.

ACKNOWLEDGEMENT

Presenting a program of this nature is a group effort, and would not be possible without the assistance of many individuals and companies. A complete listing of contributing companies will be available at the program site.

Course Objectives:

- Review the concept of prosthetically driven treatment planning
- Understand the importance of patient and laboratory communication
- Be aware of full arch fixed and
- removable prosthetic options
- Review full arch occlusal concepts
- Learn how to maintain fixed and
- removable prostheses

Fellowship

Distinguish yourself professionally through quality continuing education (CE) by pursuing the prestigious Academy of General Dentistry (AGD) Fellowship Award!

Learn more about AGD Fellowship and the requirements to attain the award from the frequently asked questions (FAQs) below. For additional questions, contact the AGD Membership Services Center toll-free at 888.AGD.DENT (888.243.3368) or membership @agd.org.

What are the requirements for AGD Fellowship?

- Active dentist membership in the AGD for three (3) continuous years (36 months) by December 31 of the year in which your Fellowship application is received.
- Completion of 500 hours of FAGD-approved CE credit, with at least 350 hours earned in live course attendance.
- Successful completion of the AGD Fellowship Exam.
- Completion and approval of a Fellowship application.
- Attendance at an AGD Convocation Ceremony, held during the AGD annual meeting, to receive your award (successful candidates are allowed three years following application approval to complete this requirement).

I joined the AGD during my last year of dental school. Does that year count toward my three years of continuous membership?

No, student membership in the AGD does not count toward this requirement for Fellowship. Your three years of continuous active dentist membership in the AGD begins no earlier than the date of your dental school graduation.

Do I have to wait until I have earned 500 CE credit hours to take the AGD Fellowship Exam?

No, you may take the exam as early as 90 days after your active dentist membership in the AGD begins, and before you've fulfilled the other two requirements for Fellowship. The AGD recommends that recent graduates take the exam within their first two years of active dentist membership while they're still familiar with test-taking and the subject material covered.

When and where can I take the exam?

The exam is available year-round at Schroeder Measurement Technology (SMT) computer testing centers throughout the U.S. and Canada. In addition, a paper/pencil version of the exam is offered annually at the AGD Annual Meeting & Exhibits and at various locations in the fall immediately following the AGD National Fellowship Review Course.

How do I locate a local SMT computer testing center?

Visit www.agd.org to find a testing center online. Simply head to the Education & Events section of the AGD website and click on "Exam/Awards," then "Fellowship Exam." Testing appointments may be made through SMT's registration department once a paid exam application has been received and processed by the AGD Headquarters office.

How many times can I take the exam in a single year?

There are two different computer-based exams available annually, October through December, so you may have up to two chances in a given year. You may continue to re-test until you pass, but you may not take the same exam version twice.

How is the exam graded?

The Fellowship Exam is norm-referenced. Scores are based on the candidate's total number of correct answers. The annually established minimum pass score indicates a level of dental knowledge appropriate for attainment of the Fellowship Award. Each year's exam is statistically equated to the previous year's exam, assuring the pass level is consistent so that candidates do not have to compete against each other.

How many members pass the exam the first time?

In a given year, approximately 70 to 75 percent of members taking the exam will pass on their first attempt.

What tools are available to help me prepare for the exam?

- AGD Fellowship Exam Study Guide: The AGD sells
 multiple print and online versions of the AGD Fellowship
 Exam Study Guide for \$96 each. Submit a completed
 copy of your answer sheet to receive 15 hours of CE
 credit. Multiple editions of the study guide may be
 purchased; however, CE credit will be granted only once
 for a maximum of 15 hours.
- AGD National Fellowship Review Course: The AGD National Fellowship Review Course is offered annually at the AGD Annual Meeting & Exhibits and at various locations throughout the country in the fall. The national review course is designed to provide a refresher in 17 different dental disciplines, as well as to assist members in preparing for the AGD Fellowship Exam, which they have the option to take on the day immediately following the review course. All registrants will receive a complimentary copy of the AGD Fellowship Exam Study Guide prior to attending the national review course.
- Local AGD constituent courses: Select AGD
 constituents may offer a local Fellowship Exam prepcourse or study group. To determine availability in your
 area, visit the Membership section of the AGD website
 and click on "Member Connections," then "Connect With
 Constituents."
- Other study aids: Several dental review books are available through online retailers such as Amazon and eBay, including Mosby's Review for the NBDE Part II and First Aid for the NBDE Part II. Additionally, a series of comprehensive dental flashcards are available for purchase online at www.dentaldecks.com.

Can I receive Fellowship credit for attending any live CE course?

No, to be eligible for Fellowship credit, course content must be scientific in nature and directly related to the practice of dentistry. Additionally, only courses hosted by approved program providers are eligible for Fellowship credit. Approved program providers include those accepted by the Committee on Program Approval for Continuing Education (PACE), intrastate program providers approved by AGD Constituent Academies, or those approved by the American Dental Association's (ADA) Continuing Education Recognition Program (CERP). As an exception, however, up to 10 hours of credit may be applied toward Fellowship for approved self-improvement courses taken on or after July 1, 1985.

Can I receive Fellowship credit for completing a postgraduate residency training?

Yes, individuals who join the AGD within four years of completing a one-year Commission on Dental Accreditation (CODA)-accredited General Practice Residency (GPR) or Advanced Education in General Dentistry (AEGD) program may earn up to 150 hours of participation credit, and up to 300 hours of credit for a two-year program.

A maximum of 450 hours of participation credit may be earned for non-concurrent completion of both program types. Credit is awarded as follows:

- Current AGD member upon program completion: 100 percent of credits awarded
- Join the AGD within one (1) year of program completion: 100 percent of credits awarded
- Join the AGD within two (2) years of program completion:
 75 percent of credits awarded
- Join the AGD within three (3) years of program completion: 50 percent of credits awarded
- Join the AGD within four (4) years of program completion:
 25 percent of credits awarded
- Join the AGD four (4) or more years after program completion: 0 percent of credits awarded

Please note that AEGD and GPR programs are the only residencies that qualify for Fellowship credit. To receive credit, send either a copy of your residency certificate or a letter (on official letterhead) from the director of the residency program verifying that you have completed the program. Be sure to include the beginning and ending dates of the program, along with the type of residency completed.

Can I receive Fellowship credit for teaching?

Yes, if you have a faculty appointment at an ADA- or Canadian Dental Association (CDA)-accredited institution, you can receive up to 150 hours of approved credit. To receive teaching credit for a faculty appointment, a verification letter from the director of the program is required. The letter should be on official letterhead and include the dates of the teaching appointment and the subject taught. CE presentations sponsored by AGD PACE- or ADA CERP-approved providers also are eligible for credit. Verification on letterhead or other official correspondence must be sent by either the sponsoring organization or the lecturer.

A combined maximum of 150 CE credit hours from teaching/publication may be applied toward Fellowship and Mastership.

Can I receive Fellowship credit for publishing an article?

You can receive as many as 150 CE credit hours toward Fellowship and Mastership for authoring published scientific articles. To receive credit for an article that has been published, submit a copy of the article as it appears in the publication. Articles written about practice management are not eligible for credit. Credit is awarded as follows:

- 40 hours for scientific articles published in a refereed journal (30 hours for articles published in a non-refereed journal)
- 65 hours for writing a textbook or chapter of a dental textbook
- 10 hours for a published case report, technique paper, or clinical research report in a refereed journal (5 hours for articles published in a non-refereed journal)

A combined maximum of 150 CE credit hours from teaching/publication may be applied toward Fellowship and Mastership.

Can I earn the 500 CE hours required for Fellowship by teaching, publishing articles, and taking self-instruction courses only?

No, a minimum of 350 of the 500 total CE hours required for Fellowship must be taken through live course attendance. A combined maximum of 150 of the required hours may be earned through teaching, publication, or self-instruction.

How can I track my progress toward Fellowship?

Use your online transcripts to monitor your CE activities. The AGD Award Transcript lists all of the credits that you've accrued since joining the AGD that are approved for Fellowship credit. To access your Award transcript at any time, visit the Education & Events section of the AGD website and click on "Manage My CE," then "View My Award Transcript."

I have registered to take the AGD Fellowship Exam. Am I automatically registered to receive the Fellowship Award?

No, there are two separate applications and fees for Fellowship. The first application registers you for the Fellowship Exam. Once you have passed the exam, a Fellowship Award application will automatically be sent to you, or you can call and request an award application whenever you are ready. Your award application must be postmarked by December 31 in order to qualify to attend the Convocation Ceremony and receive your Fellowship at the AGD annual meeting the following summer.

Refer a Colleague to Join the AGD and You Could Win a Trip to AGD 2017!

Recruit at least one qualifying new dentist member to the AGD by Dec. 31, 2016, and you'll be entered to win our grand prize — a trip to AGD 2017 in Las Vegas, including:

- Round-trip airfare
- Three-night stay at Caesars Palace Las Vegas Hotel and Casino, the AGD 2017 Headquarters hotel
- Complimentary meeting registration
- \$200 to apply toward CE courses offered at AGD 2017*

* No purchase necessary to enter or win. Promotion runs through Dec. 31, 2016, and is open to all AGD dentist members in good standing who recruit at least one qualifying new dentist member to the AGD during the promotional period. Random drawing to be held on or about Jan. 1, 2017. Both the recruiting winner and the winner's new member will each receive a trip to AGD 2017. If the winner has recruited more than one new member to the AGD by Dec. 31, the AGD will choose at random which new member will accompany the winner to AGD 2017 in Las Vegas. Travel to be completed July 13 to 15, 2017. Promotion subject to all applicable federal, state, and local laws and regulations. Visit www.agdagg/refer for complete program rules and eligibility.

Return this application with your payment to: Academy of General Dentistry, 560 Wg Lake St., Sixth Floor, Chicago, IL 60661-6600.

If paying by credit card, fax to 312.335.3443.

Per the U.S. Revenue Reconciliation Act of 1993, 1.2 percent of membership dues payment is allocable to the AGD's lobbying activities and is not deductible as a business expense. Please consult with your financial adviser for detailed information. Dues rates effective through Sept. 30, 2015. Contact the AGD or visit www.agd.org for updated rates.

Individuals joining July 1 to Sept. 30, 2016, pay half the annual headquarters membership dues (does not apply to student, resident, first-year graduate, or affiliate members). Individuals joining Oct. 1 to Dec. 31, 2015, enjoy membership through the end of 2016. Paid dues will be applied to the upcoming year.

Tripartite Membership Application

For membership in the American Dental Association and your state and local dental societies

ADA American Dental Association®

America's leading advocate for oral health

Department of Membership Information 211 East Chicago Avenue, Chicago, Illinois 60611 T 312.440.2607 800.621.8099 ADA.org

Thank you for your interest in becoming a member of organized dentistry.

The American Dental Association and your state and local dental societies have a tripartite membership structure. Therefore, final approval of your application provides you with membership at all three levels of your professional associations: local, state and national. Your application will be processed and considered by your state or local society, which will provide you with additional information regarding their specific application procedures. Please apply to the society where you conduct or will conduct the major portion of your practice; your state or local society may request additional information. For complete information regarding the *Bylaws* and the *Principles of Ethics* and *Code of Professional Conduct* of the ADA which govern the professional conduct of members, please visit ADA.org/ethicsconduct. A list of state dental societies can be found at ADA.org/societydirectories.

Please complete all sections of this application. Print or type all information.

Please submit your completed 2-page application to your state or local dental society. A listing of state dental societies is available on our website at ADA.org or you may contact the ADA Department of Membership Information at 312.440.2607 for more information.

Membership in the ADA is based on the calendar year from January to December. ADA dues allocation to JADA, \$25.00, to ADA News, \$8.00, and is not deductible from the dues amount.

United States Taxpayers Please Note: The tax law prohibits taxpayers from deducting the expenses that they incur by engaging in lobbying, as defined in the law. Accordingly, only that portion of an associations' member's dues not attributable to lobbying activities remains deductible as an ordinary and necessary business expense. The law requires associations to provide their members with a reasonable estimate of the non-deductible percent of their dues attributable to lobbying activities. For 2012, 8.8% of a member's ADA dues are allocated to lobbying activities (\$45.00 for members paying the full active dues of \$512.00). Dues payments and contributions are not deductible as charitable contributions for federal income tax purposes.

^{*}Your society will contact you if payment is required. Do not send payment now.
