

The Illinois Academy of General Dentistry, in conjunction with the Wisconsin Academy of General Dentistry, is pleased to present this program leading to Mastership certification in the Academy. To complete the Mastership Program, candidates must enroll for 600 hours of continuing education, 400 of which must be of participatory nature.

CE Credits

16 hours of participation credit for those who attend the 2 days of lecture and hands-on. 34 total hours of participation credit to those who attend the 2 days of lecture and hands-on, complete the assigned protocol in their office, and return to document the protocol assignment.

Protocol Reporting Session

The reporting session for in-office protocols from previous Mastertrack sessions will be held at 5:00 pm on Thursday, October 11, 2018 at Courtyard by Marriott Wood Dale/Itasca, 900 N. Wood Dale Rd, Wood Dale, IL 60101 **Please RSVP to Dr. Sy Wachtenheim by October 4, 2018 to present protocol reports on past Mastertrack Sessions.**

Meals

Attendees will be furnished a continental breakfast each morning, lunch each day, and a Friday night banquet, the Dr. Daniel Beer Memorial Bash.

Who Should Attend?

These hands-on programs were originally designed for AGD Fellows striving to be AGD Masters, but we've learned that these programs can be valuable to all dentists—from new grads to the most experienced clinicians.

Speaker's Biography

Dr. Olsen was on the faculty of MUSOD in Anatomical Sciences and was a previous course director for General/Oral Pathology at MATC for over 20 years collectively. He is a general dentist who practises in Franklin, WI. He has been lecturing professionally for many years. Dr. Olsen received his Diplomat status in ICOI in 2011 and is an examiner for the written and oral board exam for the Diplomat honor.

Course Description

This 2-day multidisciplinary course will teach general dentists how to recognize signs of oral cancer and treatment modalities. Learn specific uses of biopsy and diagnostic tools in oral cancer. A summary of specific oral medications used in dentistry for pain management, to infection control, to growth factors in healing. The practitioner will learn to recognize implant infections and failures. The lecture will focus not only on the ways to avoid failures with present technologies, but also how to treat them.

Course Objectives

Day 1:

1. Learn about the features of oral cancer and lumps and bumps.
2. Learn how to diagnose benign, premalignant and malignant growths.
3. Learn how to capture diagnostic features for curative treatments.
4. Use diagnostic tools in oral cancer diagnosis.
5. Learn how to do a biopsy and provide information for it's diagnosis.
6. Update your knowledge of common medications used in your dental practice.
7. Learn of the efficacies of medicines used in patient management of differing oral problems.

Day 2:

1. Learn many ways to avoid implant problems.
2. Learn how to differentiate implant problems from infections.
3. Learn about present technology that will enable
